## Supportability Analysis - Stock Out Report (SA-SOR)

- Only reflects EBS items – Source of Supply (SOS) of SMS
- The purpose of the Stock Out (SO) information within the SA-SOR report is to proactively identify supportability issues before they actually occur
- The data is available to all authorized Customers with the exception of the DoDAAC query, which is restricted to Customers that are participating in Demand Data Exchange (DDE) Customer Collaboration
- Users can request access and view the SA-SOR through DOD EMALL at website: [www.emall.dla.mil](http://www.emall.dla.mil)
- Users have the option to have the data results emailed to them, download the results to Excel/Access, or depending on query size, displayed on the screen

## Supportability Analysis - Stock Out Report (SA-SOR)

- The report returns typical supportability analysis (SA) information (such as SOH, AAC, ALT, etc.) on all NIINs queried.
- When a NIIN has an actual or projected stock out (SO) within the within the next 12 months, it will provide that information as well
- The SO info is based on total DLA projected stock on hand and total requirements at the NIIN Level
- NIINs that do not have a current or projected SO will reflect a “ - ” in the following columns: Stock Out Date; Get Well Date; Past Due Receipts Date
- 
- SO and Get Well Dates are projected based on best available information at the time of the report

## Supportability Analysis - Stock Out Report (SA-SOR)

- If a NIIN with a SO has a due in receipt that is delinquent, the “Past Due Receipts Date” column will reflect the earliest scheduled receipt date
- The SO info will only be reported on NIINs that DLA manages as stocked
  - Non-stocked items will not have SO info associated with them
- The SA-SOR will reflect the “Stock Out Report Information as of” date at the top of each report
  - Red, Blue, and Orange SOs will not reflect the date the NIIN went into a SO position
  - Yellow projected SOs will reflect the projected date the NIIN is expected to run out of stock
- The SO info within the SA-SOR is updated weekly (each weekend) and most SA information within the SA-SOR is updated every 24 hours
  - Near real time detailed information for NIINs may be obtained from the DLA Orders section of DOD EMALL

## Current DOD EMALL SA-SOR Color Coding Definitions:

- **Red** = Stocked out now on a stocked NIIN (typically AAC D)
- **Yellow** = Potential stock out coming on a stocked NIIN (typically AAC D)
- **Yellow w** Projected Get Well Date\* (GWD) for Red, Yellow, Blue, or Orange coded Stock-Outs
- **Blue** = Non-Replenishment Item Stock-Out - with demands in the last year
- **Orange** = Non-Replenishment Item Stock-Out - with no demands in the last year
- \*No GWD provided for Red and Yellow SOs if GWD exceeds 12 months into the future. GWD for Blue and Orange may exceed 12 months into the future and is based on the last scheduled receipt date for the dues in that exist

### Stock Out Report Information as of 04/11/2008

The purpose of the Supportability Analysis Stock Out Report (SA-SOR) is to proactively identify supportability issues before they actually become backorders. Note: the stock out color determination is updated every Sunday; all other data is near real time.

**We will start with the DoDAAC Query.**

**NOTE:** This option is for Collaborative Customers only (Customers that have elected to submit forecast requirements to DLA via Demand Data Exchange (DDE) transactions vs. Special Program Requirements (SPRs))

NSN/NIIN File Upload

For information regarding those NSNs/NIINs returned, please use a text file with one NSN or NIIN per line (no mixed). Select a file with NSNs/NIINs using the "Browse" button. You may save your file for additional review or you may choose to download it to Excel by clicking on the "Download to Excel" button. In the formatted to display clearly. To do so, highlight the entire column, choose Cells from the Format menu, and all places.

NSNs

### Copy and Paste NSNs/NIINs

Or provide a new line for each comma or carriage return. Do not use the 'paste' function from other applications.

### Emailed Results

Reports (or status) from requests for emailed results will be generated only if the request includes 300 or more NSNs/NIINs in single report.

If you have been notified by email that there is a report comp

Stock Out Report Information as of 04/11/2008

The purpose of the Supportability Analysis Stock Out Report (SA-SOR) is to proactively identify supportability issues before they actually become backorders. Note: the stock out color determination is updated every Sunday; all other data is near real time.

DODAAC

Enter a Current Demand Data Exchange/Customer Collaboration (DDE/CC) Submitter/Ship To/Sold To DODAAC value and choose the type. NOTE: The DODAAC query only returns data on active DDE/CC NIINs associated with the Submitter/Ship To/Sold To DODAAC.

Emailed Results

Reports (or status) from requests include 300 or more items in one business day. Email of reports is selected when the "Send email" option is checked or

### Supportability Analysis Stock Out Report - Report Files Available for Download

Please right-click on one of the report links below and choose 'Save Target As...' to download and store the file. It is HIGHLY recommended that you save the file to your DESK TOP to ensure delivery. From there, you may save the file to any other location. The file will be in .txt format.

To save it to Microsoft Excel, open Excel first, locate the file and then use the Wizard that will convert the data to Excel format. Note that you must convert the NIIN column to text format in the last step of the Wizard to keep the leading zero or zeros in the NIIN.

You can also import the file into a Microsoft Access data base. Please visit the Training section on DOD EMALL's home page for more detailed instructions.

- [SA-SOR R09111 651-NIINS 2008-04-18 11-53-06-369.txt](#)
- [SA-SOR R09111 651-NIINS 2008-04-18 12-03-29-841.txt](#)

Additional download instructions can be found in the self training section under "SA-SOR download instructions"

Follow the instructions outlined here. You have 72 hours to retrieve your data

## Frequently Asked Questions:

- **What is the relationship between the Stock Out (SO) Date, Get Well Date, and Color Coding?**
  - Green = projected get well date for Red, Yellow , Blue or Orange SOs
  - Red = for stocked (AAC D) NIINs = stocked out now
  - Yellow = for stocked (AAC D) NIINs = projected to be stock out by this date
  - Blue = for stocked (AAC Z) with demands in the last 12 months and no stock now
  - Orange = for stocked (AAC Z) with no demands in the last 12 months and no stock (basically inactive NIINs)
- **What does it mean when the Stock Out Date, Stock Out color, Get Well Date (GWD) and Past Due Receipts Date are blank?**
  - It means that the NIIN does not have an actual or projected stock out
- **What does it mean when the Get Well Date (GWD) is blank?**
  - It means that the get well date for the NIIN is beyond 12 months for a Red or Yellow stock out condition or that no scheduled receipts are due in for a Blue or Orange condition
- **Is there a time limit that changes an item from yellow to red?**
  - Not in particular but the most frequent duration for a change like this would be weekly. The red, blue, and orange mean it is out of stock now. Yellow means it is projected to run out of stock by that date reported in the “stock out date” column of the SA-SOR
- **Why do some columns on the SA-SOR have asterisks denoted?**
  - Those columns denote stock out info. That info is updated each week based on the “Stock Out Report Information as of” date listed on the top of the report. Most of the other data within the report is updated daily.
